## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6 are finally rejected under 35 U.S.C. 103(a) as being unpatentable over Smack in view of Seelig, as set forth in previous Office Action.

Claims 1-6 are finally rejected under 35 U.S.C. 103(a) as being unpatentable over Bliss in view of Seelig, as set forth in previous Office Action.

### ***Response to Arguments***

In response to Applicant's argument that Smack, Bliss nor Seelig does not teach nor suggest a slot car powered by a manually driven electrical power generating means, the Examiner disagrees. Smack teaches in col. 1, par 3, that it is known to propel miniature cars along a track using a person's limbs and would have been obvious to use a car for the device of Smack. Smack further teaches in col. 4, line 55 to col. 5, par. 6, that foot controls are used to propel respective figurines along the track and therefore, teaches the broad recitation of a "manually driven electrical power generating means". In reference to Bliss and Seelig, applicant's attention is directed to the rejection set forth in the previous Office Action.

Further, the limitations on which Applicant relies (i.e., the electrical power can be generated by physical effort and exertion through use of player's limbs and the player

exert his movement to generate electrical power to drive the car) are not stated in the claims. It is the claims that define the claimed invention and it is claims, not the specifications that are anticipated or unpatentable. *Constant v. Advanced Micro-Devices*.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
